Mastering your slides

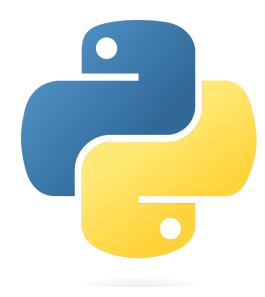

COGS 137 – week 9 26th of November 2024 Quirine van Engen

Outline

- Bulletpoints: one by one
 - Powerpoint example
- Results figures
 - Python tips & tricks
- Matching the colors of your slide with your outfit
- Figures: step by step
 - Steps to introduce a figure
- Pick a font that is easy to read
- Title slide & titles
- Reference slide
- Slide numbers just add them please

Spacing

- Bullet point 1
- Two is a crowd
- Third time is the charm
- Four horseman of the apocalypse
- High five

- Bullet point 1
- Two is a crowd
- Third time is the charm
- Four horseman of the apocalypse
- High five

Results: figures

How to present a scientific figure

- 1. What is on the x and y axis?
- 2. If you have a legend, explain the classic rockcolors/shapes eurohouse-3. Highlight what you see in the duetdata pirate metal -Statistical test results 4. 2 8 10 0 Main take-away (title) 5. karaoke score

8

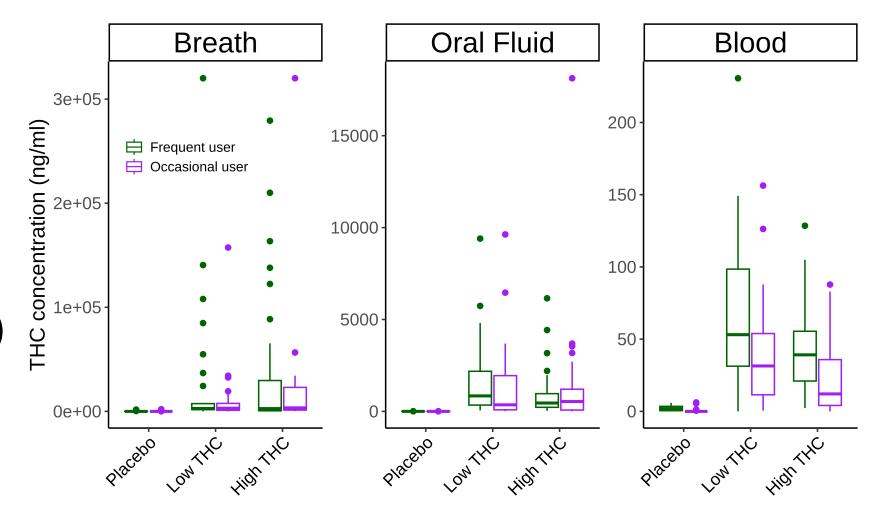

*

*

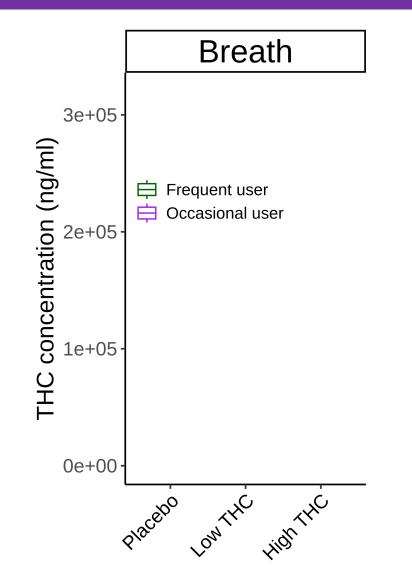

Now you try!

1. Axes

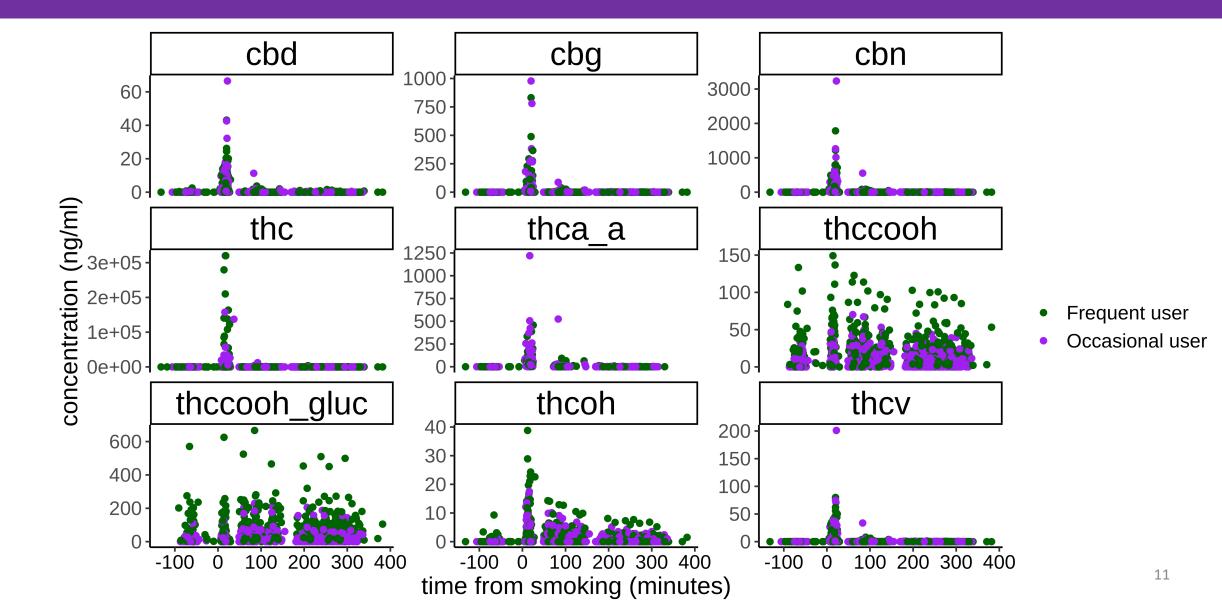

- 2. Legend
- 3. What do I see?
- 4. Stats?
- 5. Main take-away (title)

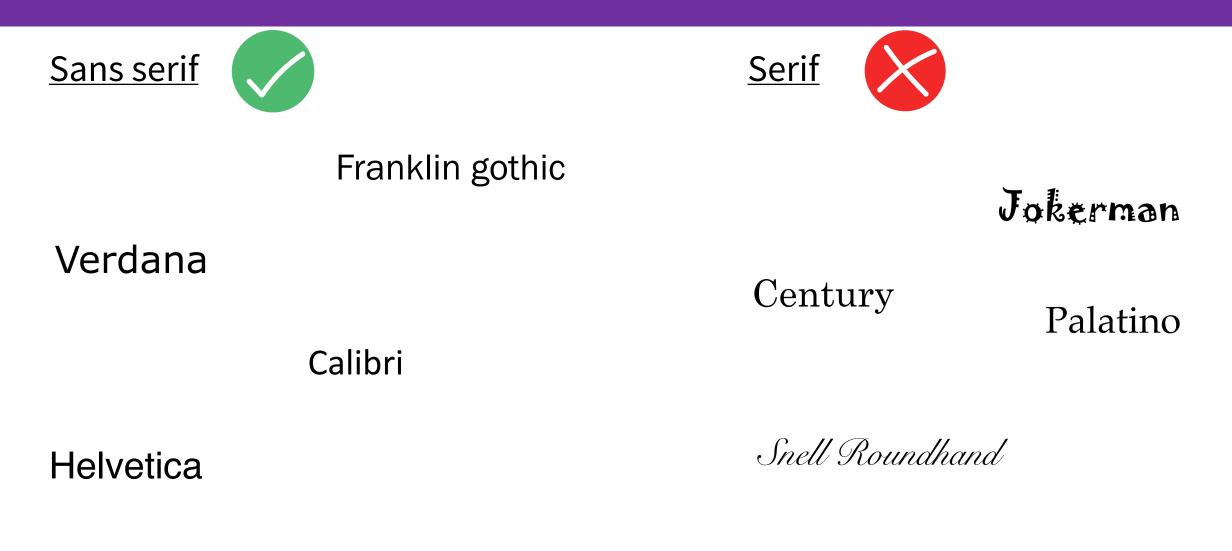

THC % are higher in frequent users than occasional

Have another go!

Pick a font that is easy to read

Pick a font that is easy to read

Pick a font that is easy to read

Titles of slides & Title slide

- Title of each slide = main point you want to get across
 - Introduction → "Increase in cannabis users"
 - Results → "THC concentration indicates recent use"

- Title slides:
 - Title
 - Ocassion
 - Date
 - Name

Treasure map: Aperiodic Activity - Brain States & Cognition

Chapter 1: Brain states

Aperiodic activity is reliably different between brain states and consistent across species

Aperiodic Activity Plays a Significant Role in Brain States and Cognition

Chapter 3: Working memory (causal)

Causally manipulate endogenous aperiodic activity to enhance working memory

Please share your tips and tricks!
